MEMORANDUM FOR: [REDACTED]

SUBJECT: Crynology of U.S. Policy of Encryption of Telemetry

1. I met with DDR&E personnel (specifically, Dr. Cooper) today (7 March) and apparently have successfully located a document which outlines a history of U.S. policy and actions relevant thereto since 1960 on encryption of telemetry. The document should be in my hands next week.

2. This historical work apparently was done related to some decisions on the TRIDENT program and hence is fairly current. As explained to me, it discusses implications of U.S. encryption in terms of SALT which would be useful for our purposes. It may be necessary after receipt of the paper to meet a couple of times or so with Dr. Ken Jordan (DTAC) in Tom Reed's shop.
